

Calibrated® V-Lok® Inflation System

Accurate: The Calibrated® V-Lok® System clearly indicates whether or not the correct size cuff is being used. The center of the bladder is clearly marked on the inner and outer surfaces of the cuff for correct application on either the right or left limb.

Durable: Baum cuffs are made of tightly woven, heat set, Dacron™ polyester fabric that is double stitched at critical points for long wear. Hook and loop fasteners are evenly matched in holding strength to provide the optimal number of open-close cycles.

Comfortable: Cuffs conform to the shape of the limb and have no hard, stiff edges.

Latex-Free: Provide a high quality alternative for patients and practitioners who are hypersensitive to natural rubber latex. The inflation bulb and bag are a special blend of Neoprene that is resistant to attack from ozone, acids, bases, alcohols, and various hydrocarbons.

Safe: Each cuff is treated with an effective anti-microbial agent.

Decorated & Disposable Cuffs

Accurate: The Calibrated® V-Lok® System clearly indicates whether or not the correct size cuff is being used. The center of the bladder is clearly marked on the inner and outer surfaces of the cuff for correct application on either the right or left limb.

Decorated: Figures of animals and toys have been added in the hope that a child's anxiety and confusion may be diminished while the blood pressure is being measured.

Disposable Cuffs: are **Latex-Free** and fully interchangeable with our complete line of reusable cuffs and are intended for single patient use to help prevent cross contamination. They are available with two tubes (5220 or 5260 series) or one tube (5130 series). For use with manual sphygmomanometers or electronic non-invasive blood pressure monitors.

Bulbs, Valves & Inflation Bags

Seamless: Baum bulbs and inflation bags are made of soft, smooth, dipped latex or Neoprene for seamless construction. They are protected against accelerated aging by means of effective anti-oxidants and anti-ozonants compounded in the liquid latex.

Latex-Free: Provide a high quality alternative for patients and practitioners who are hypersensitive to natural rubber latex. The Inflation bulb and bag are a special blend of Neoprene that is resistant to attack from ozone, acids, bases, alcohols, and various hydrocarbons.

Air-Flo® Control Valves

Instantly Responsive: Air entering the system is regulated by resilient valve tip of specially formulated silicone rubber designed for quick recovery and resistance to distortion and aging.

Smooth Operating: All key interior parts are stainless steel for corrosion-free, non-stick operation.

Durable: The Air-Flo® Control Valve body and air release mechanism are precision machined brass, nickel and chrome plated. Conical valve seat is integral with the valve body; it cannot loosen and cause leakage.

Color Coded Cuff Sizes

All six cuff sizes are provided in Medium Blue unless otherwise specified. The color code for the cuffs shown above is as follows:

G - Gray **T** - Tan **DG** - Dark Green
MB - Medium Blue **S** - Scarlet **DB** - Dark Brown

Durable: Baum cuffs are made of tightly woven, heat set, Dacron™ polyester fabric that is double stitched at critical points for long wear. Hook and loop fasteners are evenly matched in holding strength to provide the optimal number of open-close cycles.

Comfortable: Cuffs conform to the shape of the limb and have no hard, stiff edges.

Safe: Cuffs are treated with an effective anti-microbial agent and can be paired with Non-Latex components for use with patients who are sensitive to natural rubber latex.

Quality: Baum components incorporate superior design, materials and workmanship to provide unsurpassed value.
